PROFILE

BIT student at Informatics College Pokhara with strong writing, research, and communication skills. Familiar with basic SEO concepts and digital content practices, with a genuine interest in content creation and website optimization. My hands on experience gives me a strong foundation in technical SEO – page performance, semantic HTML, meta structure, and Core Web Vitals. Motivated to develop practical expertise in keyword research, on-page SEO, and content optimization while leveraging strong research and writing skills to contribute to effective digital marketing strategies.
